# SERVICES

**Substance Abuse Education & Prevention:** The counselor provides information to individuals or groups wishing to better understand their particular problem relating to substance abuse.

**Anger Management:** learning to recognize signs that you're becoming angry, and taking action to calm down and deal with situations in a productive way.

**Individual Counseling:** meeting with the counselor on a one-to-one basis, the emphasis is on helping you obtain insights, which can enhance your problem-solving and coping skills.

**Outreach/Aftercare:** provide the opportunity for transitional support back into the community and to consolidate skills learned in the treatment setting, including relapse prevention, problem solving and self help skills. Aftercare can help provide additional support for people during the transition from treatment into the community.

**Brief Interventions:** are individual sessions provided to people who are waiting to be assessed, who are waiting to enter treatment, who may have less severe substance abuse problems or who have completed treatment. The interventions use Motivational Interviewing to enhance motivation to make positive change, according to the person's particular stage in their process of change.
